John D. Stiller, Environmental Compliance
Manager
Burlington Environmental, Inc.
1011 Western Avenue, Suite 700
Seattle, Washington 98104

Dear Mr. Stiller:

This concerns the May 27, 1993, Environmental Protection Agency (EPA) inspection which was conducted at facilities of Burlington Environmental, Inc., located at 734 S. Lucile, Seattle, Washington. The inspection was conducted by W. Douglas Smith to determine compliance with the federal PCB (polychlorinated biphenyl) regulations which were promulgated pursuant to the Toxic Substances Control Act (TSCA).

As part of the inspection, copies of manifests were obtained. One manifest obtained, Uniform Hazardous Waste Manifest Number 40386, listed Westwood Town Center, Inc., Vancouver, British Columbia, as the generator, which released the PCB waste to Resource Recovery on April 8, 1993. The PCB waste is identified as six drums with a total weight of 2,045 kilograms.

In this regard, please identify the exact nature of the PCB waste and the final disposition of this waste. In addition, please provide copies of entry papers, e.g., bill of lading, shippers weigh bill, U.S. Customs papers, etc., concerning the shipment shown on the described manifest, including documentation which shows the importer of record.

If you have any questions, please call me at (206) 553-7369.

Sincerely,

William M. Hedgebeth
PCB Team Leader
Toxic Substances Section
